

COMPRESSION DIES

Huskie Die Chart

Huskie dies are configured to be equivalent to Burndy dies of respective size. When using Huskie HT series dies consult the connector manufacturer for their recommended die cross referencing and application instructions. All Huskie dies are machined or cast from solid steel stock and cast hardened to 45-50 HRCX and are guaranteed for 10,000 operations. These dies are also marked with HT numbers and Burndy cross reference numbers to make cross referencing easy and less confusing. The following chart lists Huskie and equivalent Burndy numbers for reference only. Other manufacturer die numbers are also

listed to aid the user in selecting the proper die cross reference numbers when using a particular connector. All connectors are different and the connector manufacturer should be consulted in each case. Many manufacturers offer different size connectors for the same wire size. Huskie Tools, Inc. is not responsible in the event of misuse or misapplication of die sets. Huskie Tools is not a connector manufacturer, but a tool and die supplier

FOR REFERENCE ONLY! CONSULT YOUR CONNECTOR MANUFACTURER FOR EXACT CABLE, CONNECTOR & DIE SELECTION.
