

HYDRON INCORPORATED

MEASURING STICKS

FOR VERTICAL MEASUREMENT (Tested per OSHA and ASTM F-711.)

All Models Supplied with Foam Filled Tip Section

Light weight, safe and compact. Carry inside car or truck. Ideal for taking fast and accurate vertical measurements of over head lines, highway clearances, structural heights and checking sag. Eye-level reading models eliminates need for calculations. Extended height is shown at top of base section. Positive locking sections and accuracy of measurement assured by fast acting spring loaded pin lock at base of each section. Light weight plastic hook on tip end. All parts are standardized for quick, economical replacement.

ENGLISH GRADUATION

- All models with English Graduation have red markings each intermittent foot of total length for ease in identification of measurement.
- Base color of fiber glass sections is safety yellow.
- Graduation marks and numerals are permanent. Will not chip or peel.
- All models are marked with foot, inch, and one-half inch graduations.

METRIC GRADUATION

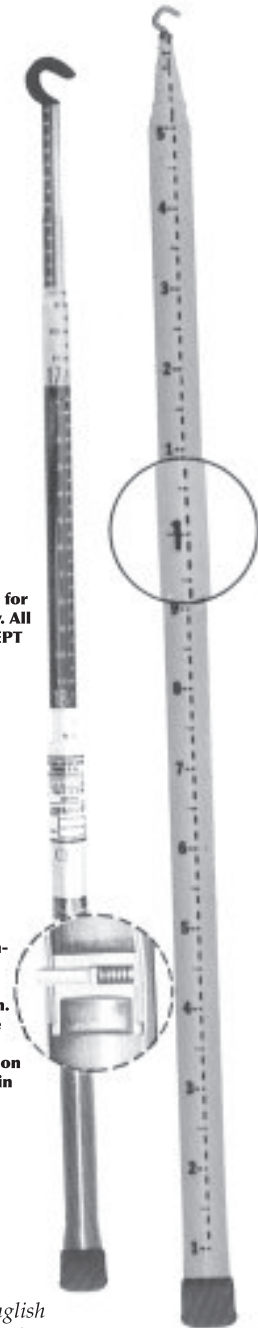

- Graduations are in meters, decimeters and centimeters.
- Meter numerals are printed in large red figures.
- Decimeter graduations are numbered one thru nine in large red figures.
- Centimeter scale is designed for quick and easy reading.
- Graduations are red printed on light yellow fiber glass tubular sections.
- Graduations will not chip or peel.
- All models are designed to read measurement at top of base or outer section. No calculations required.

TRUCKERS "LOAD HEIGHT" MEASURING STICK 15 Ft. Extended Length

For measuring vertical heights of loads on transport trucks, trailers and other elevated structures. Fiber glass arm is attached to tip section of eye level measuring stick with a special aluminum casting enabling the 36" (inch) arm to be extended in a horizontal position for reaching over objects to obtain an accurate measurement of load height. Arm can be folded down for transport or storage.

No. E-15
Wt. 2-3/4 lbs.

Note: Pictures for reference only. All sections, EXCEPT BASE, have measurement markings.

SURE-LOCK JOINTS SAFE...Non-conductive molded lock assembly with positive locking pin. Locks serve as base for intermediate sections. Each section heavily reinforced in locking area.
