

# HYDRON INCORPORATED

## CONNECTORS & ANCHORS

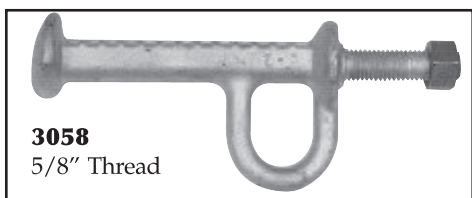

**30 - The Flange**

Some towers do not have suitable anchorage points. To retrofit a tower with a fall protection wire or rail system is costly. The fall protection concept from Duke Power and Buckingham is to put suitable anchorage where you climb. On an existing tower simply add a flange behind every third step bolt to provide a suitable anchorage point.

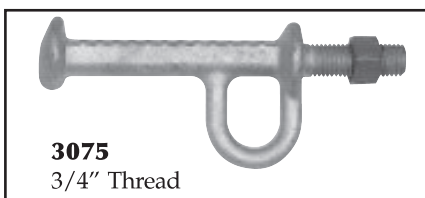

For new construction, simply install a step bolt with an anchor eye built in.

### Buck Hooks

The Buck Hooks offer fall protection from the ground to elevated heights and back to the ground. The system can be used in conjunction with two retractable lanyards and a shock absorbing lanyard or a 5/8" rope grab. Note: The 50371 style head may be ordered with a universal head adapter. Part Number 50371U.

### Fiberglass Adjustable Pole

This adjustable fiberglass pole has a push button to attach and release the 50361 and 50371. For poles with a universal adapter, add suffix "U" to the desired part number.

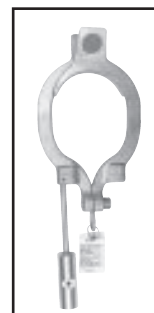

<b>No.</b>	<b>Adjustable Size</b>
50363	6' - 12'
50362	8' - 16'
50364	8' - 24'

## ROPE AND CABLE GRABS

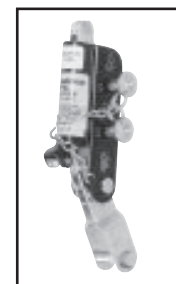

**5004**  
5/8" Rope Grab will move freely up and down until a fall occurs, then it locks to the rope.

**5004F**  
5/8" Rope Grab moves up and down the rope with user until a fall occurs, then it locks to the rope. This rope grab also has the added feature of a park brake, so the user can lock the grab above their head while working to minimize the fall distance.

**5004T**  
This Rope Grab is made to fit 5/8" and 3/4" rope. The grab is made of high quality aluminum alloy with dual cams for better braking. This grab will move freely up and down until a fall occurs.

**5013**  
This Cable Grab is designed to work on 3/8" cable. Should the user fall while ascending or descending, the cable grab will lock onto the cable preventing the user from falling more than one foot.
