JE Series Foam Core Lay-Up Sticks & Pruner Poles

At 1-1/4" diameter, our original JE-Series foam core fiberglass pole is still Jameson's highest quality pole. Its strength to weight ratio is unmatched by any pole on the market. In addition, it has increased flexural strength and a moisture barrier for high dielectric protection. And Jameson uses aircraft grade aluminum ferrules with an exterior leaf spring locking button, giving a secure and positive connection when attaching pole extensions and accessories.

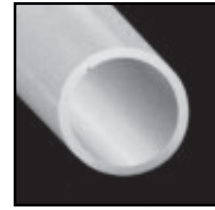

No.	Description
Foam Core Extension Poles With standard male and female ferrules.	
JE-3	3' Foam Core Extension Pole
JE-6	6' Foam Core Extension Pole
JE-8	8' Foam Core Extension Pole
JE-10	10' Foam Core Extension Pole
JE-12	12' Foam Core Extension Pole
JE-6/3	Set of 4 Foam Core Poles (21' total length) Three 6' poles and one 3' pole
Hollow Extension Poles With standard male and female ferrules.	
FG-3	3' Hollow Extension Pole
FG-6	6' Hollow Extension Pole
FG-8	8' Hollow Extension Pole
FG-10	10' Hollow Extension Pole
FG-12	12' Hollow Extension Pole
FG-6/3	Set of 4 Foam Core Poles (21' total length) Three 6' poles and one 3' pole

FG Series Hollow Lay-Up Sticks & Pruner Poles

If you're looking to save a little money without sacrificing quality, the FG-Series hollow fiberglass pole is the one for you. This alternative to the foam core pole is Jameson's most popular fiberglass pole. The FG-Series uses the same aircraft grade aluminum ferrules and exterior leaf spring as the JE-Series.

The 1-1/4" diameter JE pole starts with a solid foam mandrel. Fiberglass is laid over the mandrel in a lengthwise and wrapping motion for superior strength.

The 1-1/4" diameter FG pole has a high strength hollow tube and a non-fiberglass surface veil. The FG's high fiberglass content and resin combination provide strength, safety and durability.

External leaf spring locking ferrule for JE and FG Series.

To insure safety, these sticks have been manufactured with a non-fiberglass surface veil that prevents fibers from blooming to the surface due to abrasion or ultra-violet exposure.

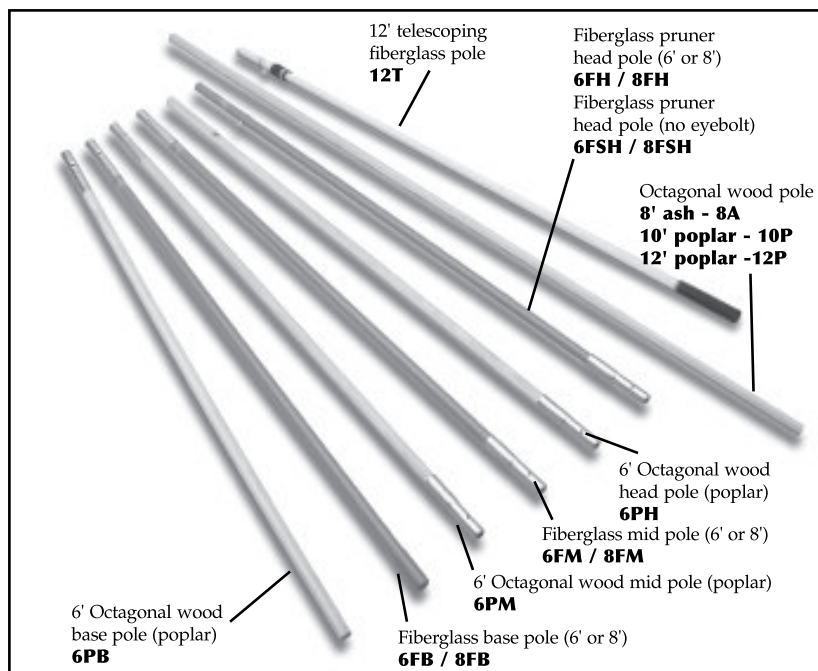

Fiberglass

Marvin fiberglass poles are lightweight, extremely durable and available in several lengths from 4' to 12'. The wall thickness is 25% greater than the average pole to ensure a ridged feel. Bright orange coloring makes them easy to spot.

Wood

Fred Marvin offers two wood poles. 1 1/4" octagonal or a 1 1/4" x 1 1/8" rectangular cut. Ash and poplar poles are available in an assortment of lengths. Each pole is hand crafted to assure its utmost strength and durability.
